Annex D – Finding Types and Categories

Term	Meaning
CAR	Corrective Action Request: a misstatement or non-conformity that must be corrected and closed before a positive conclusion, opinion, certificate or claim can be issued.
CR	Clarification Request: information is insufficient or unclear to decide whether a requirement is met; the client must provide clarification or evidence.
FAR	Forward Action Request: an issue to be addressed and checked in the next period; it does not prevent the current conclusion.
Energy data / billing discrepancy	Metered, billed or logged energy data do not reconcile, or the baseline is not supported by evidence.
Equipment performance deviation	Measured efficiency or operating parameter deviates from design, rated value or benchmark.
Regulatory / standard non-conformity	Requirement of the Energy Conservation Act, BEE regulations, ECBC, ISO 50002-1 or ISO 50001 is not met.
Critical	Finding that alone makes the reported information materially wrong or prevents a conclusion; immediate correction required.
Major	Systematic or significant failure that could lead to a material error or invalid claim if not corrected.
Minor	Isolated lapse not likely to cause a material error or invalid claim on its own.
Concern	Observation or opportunity for improvement; no action is mandatory.

Severity categories are suggested definitions aligned with MDSSPL procedures. Clause titles are summarized for reference; refer to the licensed standards and current regulatory texts for full requirements.
