## Annex D – Finding Types and Categories

| Term | Meaning |
|---|---|
| CAR | Corrective Action Request: a misstatement or non-conformity that must be corrected and closed before a positive conclusion, opinion, certificate or claim can be issued. |
| CR | Clarification Request: information is insufficient or unclear to decide whether a requirement is met; the client must provide clarification or evidence. |
| FAR | Forward Action Request: an issue to be addressed and checked in the next period; it does not prevent the current conclusion. |
| Data / calculation error | Activity data, emission factor, dataset or calculation does not match evidence. |
| Methodological non-conformity | Unit, boundary, cut-off, allocation, biogenic carbon or electricity treatment does not meet ISO 14067 or the CFP-PCR. |
| CFP report non-conformity | Required information in the CFP study report (ISO 14067, 7.3) is missing or incorrect. |
| Critical | Finding that alone makes the reported information materially wrong or prevents a conclusion; immediate correction required. |
| Major | Systematic or significant failure that could lead to a material error or invalid claim if not corrected. |
| Minor | Isolated lapse not likely to cause a material error or invalid claim on its own. |
| Concern | Observation or opportunity for improvement; no action is mandatory. |
